Updating Scientific Workshops

The European Angiology Days are Academic meetings organised yearly :

- 1) Aims
 - to offer high level updating on one topic integrating clinical and research aspects.
 - to divulge information on the progress of the European educational and research projects proposed by VAS.
 - to debate with colleagues from other specialties on a theme with a multidiscipline approach to arrive at the layout of guidelines.
- 2) The workshops will focus on a different topic each year, both with lessons and identifying the main issues for contributions and discussions.
- 3) The topics are selected by the European Angiology Days Scientific Committee from the proposals received. These **proposals should arrive at the VAS Head Office** by December each year.
- 4) Each year during the EAD's a meeting with the *patients and population is organised "Questions for the Experts"*. Here European specialists answer the patients' questions (simultaneous translation).
- 5) Each year a session will be dedicated to a **"Multidiscipline Joint Session"** with one or more Scientific Societies/Associations on a topic of common interest to arrive at a written agreement for publication.
