

News on Vascular Medicine Specialty in Europe and worldwide.

A space for news, information that the different National Societies will consider to give.

Let us go forward together, in Europe and worldwide to obtain everywhere the recognized specialty, a right and a need of vascular patients and society.

Also a fair recognition for those who work with enthusiasm and professionalism in Angiology/ Vascular Medicine even in countries where it is not yet recognized.

A general introduction in [Vascular Medicine as Speciality - VAS-INT](#)

NEW ! Swedish certification in Vascular Medicine

The Swedish Society of Medicine has approved Vascular Medicine as a certified sub-speciality for specialists in Cardiology or Internal Medicine. The certification requires 2.5 years of additional clinical rotation and training in the field, in addition to the base-speciality's 5.5 years. The training requirements and educational program is based on the non-interventional parts of the current VAS/European UEMS Training Requirements for Angiology/Vascular Medicine.

Jonas Spaak, president, Swedish society for hypertension, stroke and vascular medicine.
